

ASSESSMENT DETAILS

The assessment for this module is 100% coursework and consists of two individual assessments.

Both assessments MUST be uploaded onto your individual account on a University server for this module. The lecturer from your campus, will provide you with these details by week 2. Both assessments will be marked using Google Chrome.

Assessment 1 is worth 30% and should be uploaded by 4pm on Friday 6th November 2020

This assessment focuses on the design of a web site with various web pages. It will also include some coding for a few of these pages, albeit these will be developed further and enhanced for the second assessment.

Assessment 2 is worth 70% and should be uploaded by 4pm on Friday 18th December 2020

This assessment requires you to fully develop the web site with added functionality.

A penalty of 10% will be applied to an assessment which is submitted late, up to 1 week after the assessment deadline.

The Assessment Theme is based on Outdoor Music Festivals which applies to both assessments. For example, T in the Park, Proms in the Park, Glastonbury, Reading Festival, Rock Ness.

This could range from the history, artists, tourists, events, festival news and experience. You can use different festivals or you can focus on a specific festival in more detail.

Assessment 1

This assessment requires you to produce a web site which will consist of a number of html pages, including an index page, all of which should be uploaded to a folder called BX_A1 within your student account on the University web server (replacing X with your banner no).

These pages will include an introduction, working links and information on how you will consider design, usability and colour in the web site for the second assessment. You are also expected to have two pages which outline a draft layout of the home page (index) and a different draft layout of one of the detail pages. These pages should be developed further for the second assessment.

Criteria - Breakdown of Marks	Marks
1) Assessment uploaded: a) Uploaded in student account b) Stored in folder with correct name	3
2) Pages: a) Index page (filename is index.html) b) Links to other pages for parts 3, 4 and 5 (filenames – introduction.html, design.html, sample c) Two links to external web sites relevant to this Assessment theme.	5
3) Introduction: a) Describe the purpose of the web site? b) Who is the target audience?	4
4) Design - describe how you will consider each of the following in your web site: a) Design b) Usability c) Colour	8
5) Sample - HTML5 code of home page and detail pages: a) Sample code for the home page b) Sample code for one other page (this should be a different layout from the home page)	8
6) a) Screen dump of home page and other page in browser b) Screen dump of other page in browser	2
Total	30

Assessment 2

This assessment requires you to develop a usable, well presented, interactive web site based on the Assessment theme. All files should be uploaded to a folder called 'BX_A2' within your individual 'iwdXXX' account.

Criteria - Breakdown of Marks	Marks
1) Content a) There should be an index.html page for the home page (index.html) AND six other pages b) Text, Images, Video, Audio – relevant/appropriate for the assessment theme	2 12
2) Specific Elements a) Create a table in one of the documents to display relevant tabular information b) Create an appropriate list in one of the documents c) Create a form in one of the documents with a minimum of five different elements eg text box, radio button, select list	5 3 8
3) Validation a) Two html pages will be chosen and validated using http://validator.w3.org/ with doctype defined as html5. b) CSS	4 2
4) CSS Layout a) Use of elements for structure b) Consistent layout on detail pages	4 2
5) CSS styles a) There should be an external style sheet which is applied to at least two of the html pages b) It should have set properties for a minimum of 3 elements c) There should be an internal style in one of the documents with properties for a minimum of 2 elements	2 4 2
6) Javascript/Other features (Up to 3 marks for each feature) Information must be included on info.html about what features have been added and on what page(s). See notes below.	10
7) Documentation (an additional .html page) a) A summary of your web site (in one paragraph), highlighting the applications used to create it and details of any additional features that were added to it. b) Information on how accessibility was implemented. c) Information on how security was considered/implemented. d) Information on how you would enhance it in the future.	2 2 4 2
Total	70

Important Notes:

For Assessment 2 there should be an additional page called **info.html** which has clear information about which parts of the criteria are covered in which page(s).

For example, for simplicity assume we have html pages called a, b, c, d, e, f, g

- Table added to b. List added to c. Form added to f.
- All pages include text.
- Audio added to g. Images added to a, b and e. Video added to b.
- External style sheet style.css used on all pages except f and g.
- Internal style, internal.css, used on f.
- JavaScript added in f and g to include a slide show and display current date.
- Documentation added in g.

A mark of zero will be awarded:

- For each assessment if it is not uploaded properly onto the UWS media server.
- For Assessment 2 if info.html page is missing.
